## SUMMARY

Strategic and data-driven Senior Analytics Engineer with over 10 years of experience in Quantitative Behavioral Analysis, Business Intelligence and Data Visualization. Expert in leveraging SQL, Python, and Tableau/Power BI to drive campaign performance, optimize SaaS metrics, and deliver end-to-end measurement frameworks. Proven track record of translating complex technical data into meaningful insights that drive change.

## EXPERIENCE

### Business Intelligence Specialist

#### PLAYSTUDIOS

July 2025 – April 2026, LAS VEGAS, NV

- Serve as a lead to integrate Scaelo affiliate tracking and partner platforms with backend systems to optimize Revenue Operations and Subscription tracking.
- Automated Google Tag Server events, increasing Paid Social ad ROI by 27% and lowering spend by 20% through advanced attribution and SaaS metrics tracking.
- Collaborate with product managers and developers to translate launch initiatives (e.g., Refer-A-Friend) into technical scoping requirements and data models.
- Reduced excess event tags by 40% through developer training and streamlined data governance with data definition documents.
- Developed technical definitions for Page and Referrer URL data to automate tracking, improving pre-launch bug detection.
- Oversaw implementation and continuous monitoring of digital marketing pixels on various media platforms, supporting data integrity for campaign optimization and ROI measurement.
- Architected and documented dataLayer requirements to optimize data collection for Google Tag Manager Server and Web platforms.
- Developed custom HTML listeners for faster event QA review inside development and staging environments.
- Provided professional guidance and coaching to team members on Google Tag Manager, GA4 implementation, and attribution models, fostering data literacy and driving strategic insights.
- Built custom JavaScript events via DataLayer for GA4 and Google Tag Manager web and server collection.

### Intermediate Marketing Automation Analyst

#### TRANSAMERICA

June 2022 – June 2025, DENVER, CO

- Queried BigQuery SQL and Salesforce CRM to identify data gaps, resulting in a \$100K return of funds from third-party contractors.
- Managed Data Governance for Google Cloud databases, reducing daily operational costs from \$900 to \$120.
- Architected data models for web analytics, facilitating seamless integration with enterprise software systems and promoting data consistency.
- Automated data loads from GA360/GA4 to Google Cloud, delivering finalized visualizations in Tableau (transferable to Power BI) for executive leadership.
- Managed and executed Universal Analytics to GA4 platform migrations, ensuring complete integration of e-commerce functionalities for robust performance measurement.
- Established recurring BigQuery table structures in Google Cloud Platform to support downstream fact table transformations and ad hoc analytical queries.
- Full Google Cloud Platform audit, providing documented logical and physical processing recommendations, log reports, and cost models.
- Partnered with engineering teams to implement Python-based Selenium automation for user event testing, improving testing efficiency and reliability.
- Developed and maintained ETL pipelines for marketing data, ensuring data accuracy and timely delivery for campaign analysis and reporting.

### Sanctions Investigator - Contract

#### Robinhood

February 2021 – June 2022, DENVER, CO

- Developed and maintained ETL pipelines for marketing data, ensuring data accuracy and timely delivery for campaign analysis and reporting.
- Designed and executed an internal productivity study across a 15-investigator team to test customized Boolean logic and keyword frameworks within OSINT workflows. Successfully reduced average research cycle times by 30% (from ~2:35 to ~1:48 per case) while maintaining robust verification standards.
- Developed specialized, targeted search queries to refine search engine logic, accelerating Enhanced Due Diligence (EDD) focus areas around international sanctions, terrorism, asset hiding, and high-risk crypto entities.
- Authored and executed an end-to-end Qualitative Marketing Research Plan using Qualtrics to identify platform acquisition drivers and friction points across distinct user cohorts (under-30 vs. over-30 multi-brokerage investors).

### Senior Specialist: Anti-Money Laundering

#### KeyBank

August 2019 - November 2020, Cleveland, OH

- Analyzed and investigated complex financial activities for diverse business types and individuals, ensuring regulatory compliance and identifying high-risk transactions, resulting in a 40% reduction in fraudulent activity.
- Performed Enhanced Due Diligence (EDD) and background checks on alerted financial activities, ensuring strict adherence to OFAC, BSA, and FinCEN regulations.
- Authored detailed narrative reports summarizing aggregate financial data, activity frequency, risk assessments, and threat verdicts for senior management and regulatory bodies.

### AML Analyst II: Counter Terrorist Finance & Anti-Money Laundering

#### AML Rightsource, Gabriel Partners Co.

August 2017 - August 2019, Cleveland, OH

- Analyzed complex financial activities for diverse business types and individuals, ensuring regulatory compliance and identifying high-risk transactions.
- Performed Enhanced Due Diligence and background checks on alerted financial activities, ensuring strict compliance with OFAC, BSA, and FinCEN regulations.
- Authored detailed narrative reports summarizing aggregate financial data, activity frequency, risk assessments, and threat verdicts for senior management and regulatory bodies.
- Generated comprehensive case files and SARs, adhering strictly to OFAC, BSA, and FinCEN legal mandates for accurate and timely reporting of suspicious financial activities.
- Analyzed and aggregated various transaction types through the creation of weekly, monthly, and yearly reports utilizing Pivot Tables and VLOOKUP for efficient data sorting and cross-checking.

### Clinical Research Assistant

DR. BEN-PORATH RESEARCH GROUP

- Applied statistical methodologies (ANOVA, regression, and factor variance analysis) and foundational machine learning frameworks to synthesize complex lab data
- Leveraged SPSS, Excel, and PowerBI to transform intricate laboratory and textual data into clear, actionable visualizations for research insights.
- Enforced strict clinical data collection protocols, aligning laboratory architecture with stringent academic and medical data governance policies
- Developed predictive models using statistical methodologies and Machine Learning algorithms to synthesize and analyze complex research data.
- Peer-Reviewed Presentation: First author of predictive modeling research presented at the University of Minnesota MMPI Symposium:  
*Harrington, J. T., Hicks, D. A., & Ben-Porath, Y. (2017). Social Avoidance and Shyness as Predictors of Paranoid Distress.*

January 2011 – January 2018, KENT, OH

---

EDUCATION

Postgraduate Degree, AI and AI agents for Business Applications

Texas McCombs School of Business • Austin, TX • 2026

- Python for AI: Workflows, data manipulation, EDA, and AI-assisted coding.
- Predictive ML: Linear/nonlinear models, decision trees, K-Means, ensembles, and neural networks.
- GenAI & NLP: LLM architecture, prompt engineering, RAG pipelines, and evaluation.

Master of Business Administration (MBA-MDA) in Marketing Data Analytics

Minor in Computer Information Systems and Business Intelligence • COLORADO STATE UNIVERSITY • Ft. Collins, CO • 2024 • 3.8

Bachelor of Arts (BA) in Psychology; Concentration in Personality, Assessment, & Statistics

KENT STATE UNIVERSITY • Kent, OH • 2015

---

CERTIFICATIONS

Business Intelligence Certificate

Colorado State University • 2024

- Applied data analytics and statistics with a focus on data mining, computer science applications, and operational BI.

---

SKILLS

Data & Analytics: SQL (BigQuery), Python, Tableau, Power BI, R Programming, Statistics, Machine Learning, dbt (Data Build Tool), Data Modeling, Data Governance, SPSS

Strategy & Leadership: Stakeholder Management, Technical Leadership, Cross-functional Collaboration, Strategic Problem Solving, Strategic Storytelling

Marketing & Tech: GA4, Salesforce CRM, Attribution Modeling, Marketing Automation, Amazon Web Services (AWS), Google Cloud Platform, JavaScript, HTML/CSS, SaaS Metrics
